

Reflection

A text area for the **Final Reflection**.

Indigenous water rights needs to be taken more seriously because people are still getting affected people are dying and getting sick. We need to speak up about it and actually make a difference. Everyone deserves clean water and environmental racism is not fair to the Indigenous peoples. It helped us understand that not all communities have equal access to clean and safe drinking water. The government and communities are working to improve water systems and protect natural water sources. Overall this project taught us why respecting Indigenous rights and protecting water is so important.
