Wildfires and poor air quality have contaminated certain places in the province, Nova Scotia. It has come to our concern that it is extremely unsafe for those who live there. Wildfires have been keeping people out of the woods, especially m'ikmaq communities and those who rely on the wildlife. These are the specific reasons why we chose this topic. The global goal that this issue aligns with is 'Global Goal 13 and 3' which is titled climate action.

- Elizabeth: The storyteller which she will be talking about human impact and Inaction Consequences
- Huda: The Tech / Design lead who is responsible of the site layout and the action Project (media).
- Alia: Responsible for researching about Canadas response for this issue and the Global Connection
