

School Spirit Exploration

This exploration is designed to help you explore, educate and unite your school community. Brainstorm, design, reflect and execute a plan to create an experience that unites and promotes the values of our school community. Follow the guide below to complete this exploration.

I Can	Follow the “I can” statements below to ensure that you successfully complete this exploration: • I can brainstorm and come up with a proposal for an event or experience to organize at DSA • I can come up with five questions of my own about the potential risks and benefits of my proposal • I can present my information in a clear and creative way. • I can document my process of completing this assignment in My Blueprint Portfolio
Community Event	When it comes to deciding on a potential project idea for this exploration it is important that whatever you decide to do aligns with what you are interested in. Here are some potential ideas you could explore: • Spirit Week (Past Example) ◦ Brainstorm potential themes for spirit week days, gauge the interest of the school community by creating a survey, analyze and reflect on the results, and then finally create a media campaign that educates the school community on the results and dates of spirit week. • School Newspaper ◦ Work with your peers to explore what is going on within our school community and then present your findings. Create a plan for the first issue and then carry it out. • Plan A Dance ◦ Select a school-appropriate theme for the dance, create a potential playlist and brainstorm potential decoration options. • Have an idea for a project? Speak to me and we can try and figure it out together!
Presentation	You can decide on how you are going to go about presenting your information. You just need to ensure that it is submitted to our Google Classroom. Here are some potential formats to present your information: • Poster

	• Essay • Google Slides • Create a Website • Digital Model on CoSpaces, Minecraft, or Scratch • We Video Project (Movies, podcast, GIFS, Animation)
My Blueprint Portfolio	To complete this section please log in to your My Blueprint account and select your term portfolio (the term you are currently in). Select create a post, and create a journal titled “Community Exploration”. Finally, copy and paste the questions below and then select post and then begin completing the questions in a medium you are comfortable with.
Outcomes and Competencies	<i>Investigate the relationship between physical activity and health.</i> <i>Investigate healthy ways of coping.</i> <i>Learners will implement an advocacy action in response to an issue.</i> <i>Competencies: Personal Career Development, Citizenship, Creativity and Innovation and Technological Fluency</i>
