Smartphones

Slide 1

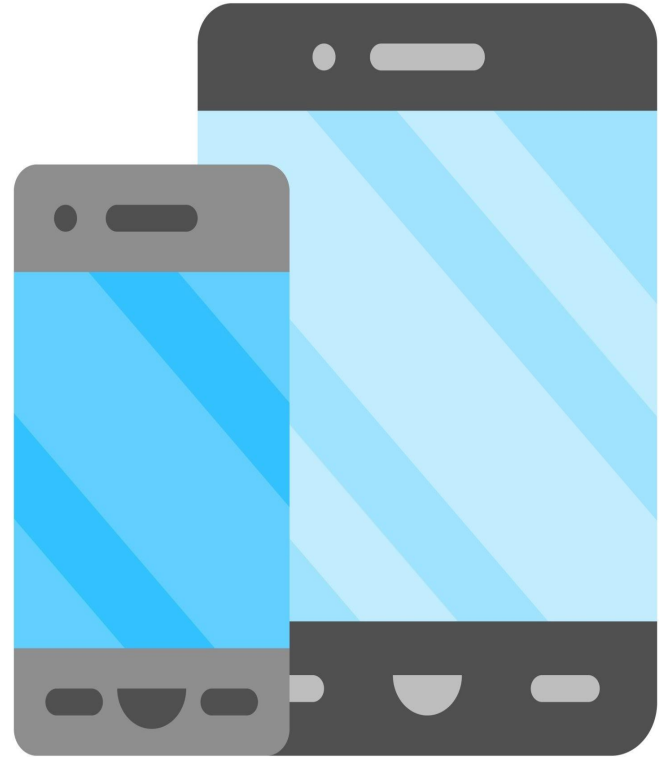

No matter what decide to spend their money on they will ultimately choose to spend money on the cheaper item. Cheaper smartphones tend to be less expensive because the effort put into making it is much less than a phone that was made ethically. By having workers paid fairly and treated fairly it means the price will be higher but at the end of the day the people will be well taken care of.

Slide 2

Democratic Republic of Congo: Children are forced into labour: mining cobalt, digging with no safety equipment, raw materials are hidden by being mixed so they cover the illegal activities. Worker must work overtime under toxic chemicals with horrible management raising stress levels within workers.

Our products come with authenticity, as workers will have health insurance, safety gear, benefits and proper training under the safety measures. Workers will be paid more than minimum wage based on their roll and will not be permitted to work overtime unless requested.

Slide 3

By spending the extra dollar you as a person will benefit much more. By going out of your way to buy the more expensive and ethical product the moral benefit you get from it outways the price difference. The first advantage you get from this is that you help communities. The money that they will be able to fund for schools and help build roads. The second advantage is that it helps the environment. By doing this the people who are working in these factories creating smartphones will be better set up by no longer having pollution and unnecessary garbage ruining their air and water. The third advantage that there is from purchasing a better smartphone is that it provides better working conditions. The current cheap factories provide an unhealthy work environment for those who are employed by the companies. By purchasing from our smartphone company the workers would be well taken care of and would never feel abused by their work.

Slide 4

Customers that buy our authentic smartphones are reducing the competition of the unauthentic smart phones in the Democratic Republic of Congo. This also gives customers a good reason to buy the smartphones from our company, as the lack of care the workers are getting in the Democratic Republic of Congo. Customers buying from us will push out the competition of factories that are influencing forced labour, putting them out of business and shutting down the factories, which decrease the amount of forced labour in the Democratic Republic of Congo.
