

Step into the Circle - **Injury-Specific Statements**

Remove tables and chairs/desks from the classroom, or hold the space for Healthy Living class in an empty classroom.

Have students form a circle.

The teacher/facilitator reads each statement.

Students step into the circle if the statement pertains to them.

Teacher/facilitator can ask a student to elaborate from time to time to foster discussion, though the activity – and it is powerful – is intended to be fun and engaging.

The following are injury specific statements. It is intended for Healthy Living 8 or 9, but can be modified for younger grades.

Sometimes a “step into the circle” session can be sustained for as long as time allows.

Step into the circle if...
